

**CIPHERLAB CO., LTD.**

## **Naurtech CETerm Now Available for CipherLab 9400 series Mobile Computer**

**Taipei, Taiwan and Issaquah, WA, USA.** CipherLab, a leading innovator in Automatic Identification and Data Capture for the retail, warehouse and distribution markets, today announces availability of Naurtech CETerm™ device tailored for CipherLab 9400 series Mobile Computer.

CipherLab 9400 series is a powerful yet user-friendly PDA-like mobile computer that delivers industry-leading features such as a built-in digital camera, multi-form data input, multi-scanning options and the ability to read and write 13.56 MHz RFID tags. It leads the industry with outstanding battery life longer than one working shift in WLAN mode and surpasses drop impact standards - important considerations for the more demanding conditions of warehouses or field-use environments.

Naurtech CETerm is a high performance Terminal Emulator (3270, 5250, VT) and Industrial Web Browser for Windows CE devices. It offers often requested functionality such as integrated barcode scanning, application customization, mobile printing and key remapping for data collection solutions while providing access to legacy and Web applications from a mobile terminal such as the CipherLab 9400. Naurtech CETerm is also tightly integrated with vertical application platforms such as SAP Netweaver ITSMobile. Deployed with Naurtech CETerm, the 9400 series offers customers a comprehensive mobile computer solution that quickly and economically meets the needs of several vertical industries such as Retail, Warehouse, Distribution and Logistics.

Naurtech CETerm is a great addition to CipherLab solution portfolio, and it will be ported to other upcoming CipherLab Windows based terminals.

### **About CipherLab**

CipherLab is a global leader in the design, manufacture, and marketing of Automatic Identification and Data Capture products and systems. The company's mobile computers and scanners are integrated into the networks of some of the world's best known logistics, retail, distribution, government installations and healthcare companies, helping them run more efficiently and effectively onsite and on the road. Operating worldwide, CipherLab is headquartered in Taipei, Taiwan with offices in China, Germany, the United Kingdom and the USA and is publicly traded on the Taiwan stock exchange (Taiwan OTC: 6160).
